

small machine to anyone

# PULVISINA

Pulvisina® is the **smaller** and **lighter** book cleaning machine. It can be place on any library desk, or combine with a transport trolley with adjustable height work position. It has been concept as preservation tool to clean collection before renting & return of book, and an ideal solution for libraries that have not volume or budget to warrant a Depulvera®. The operator has to make three steps to clean each book.

IDEAL FOR BOOKS
