DURO™ Boxboard

Properties	Values
Density (kg/dm ³):	0,83 – 0,91
Strength along the fibre (MPa):	min. 19
Strength across the fibre (MPa):	min. 9
Humidity(%):	5 – 8
pH of water leachate:	 min. 7,5
Alkalic reserve (mol/kg):	 min. 0,4

The new range of CXD boxboard and boxes are made from three different levels of boxboard. Level 1. LUXO, Level 2. REVO, Level 3. DURO.

DURO level 3, is non selected recycled waste paper which is alkaline buffered to raise the pH and extend it's lifespan but has no other archival qualification. It is classed as durable for items deemed less sensitive and for shorter term storage. However, it still offers greater protection against fire, flood and insect infestation than corrugated/fluted board.

For medium term archiving.

All boxes are made from 1000 to 1500 micron boxboard.

Also available in other thicknesses to special order on request.

Conservation By Design has always been a leader in quality archival products. We certify that our products are made to the highest specifications.
